DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically the areas of concern are:

- How does lever (40) connect with pawls (40) and (46).
- How the pawls are caused to be selectively engaged.
- How does the mechanism contained in the head body (15), function without "locking-up". It is not clear from the design how the gear members (50,60) can rotate independently.

Because the claims are so indefinite as to require substantial speculation on the part of the examiner, no art can be applied at this time.
